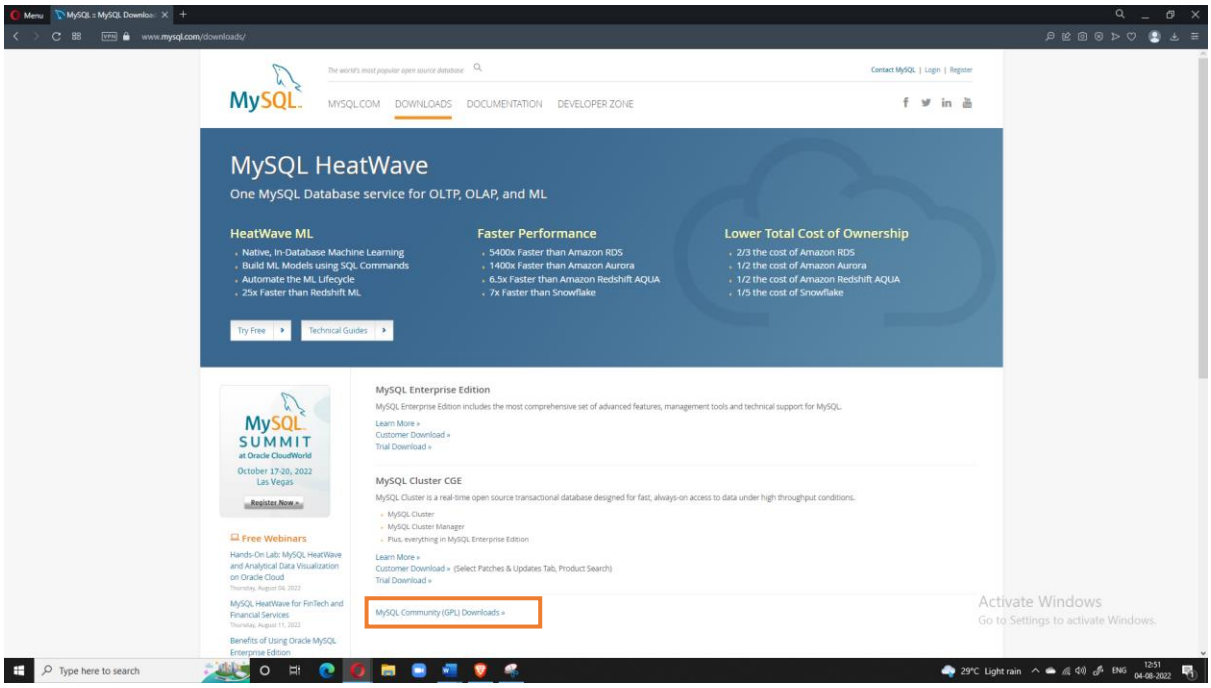
MySQL installation steps for Windows

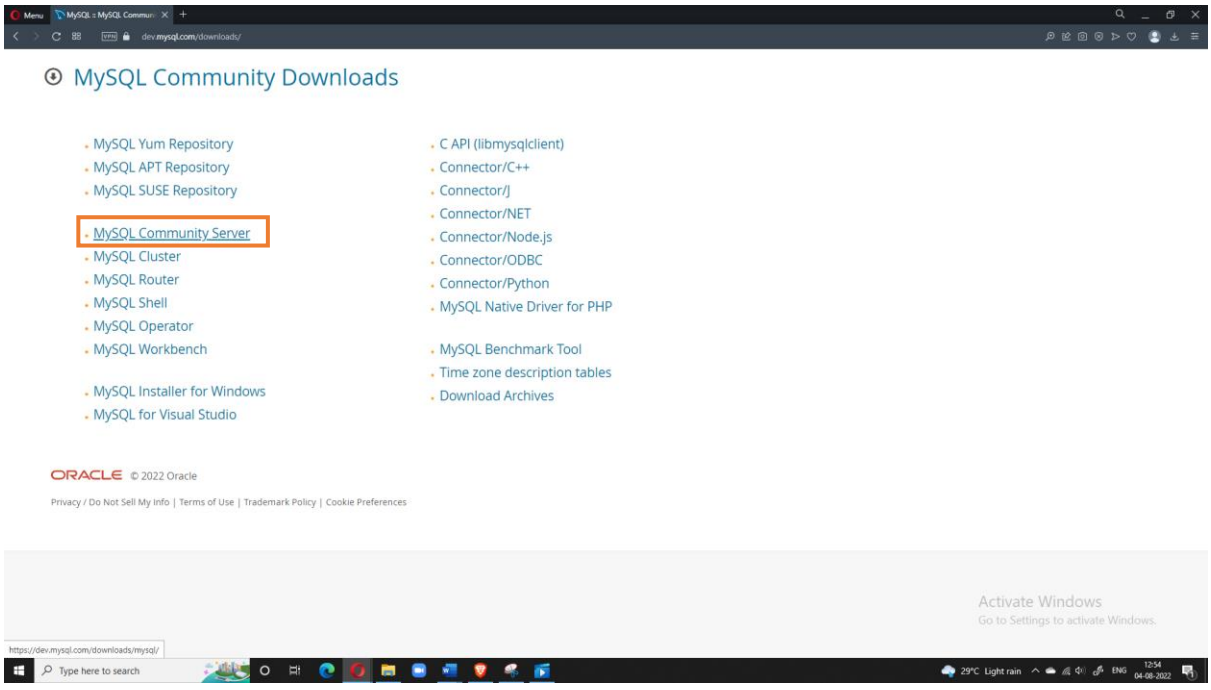
For Windows:

Go to https://dev.mysql.com/downloads/installer/

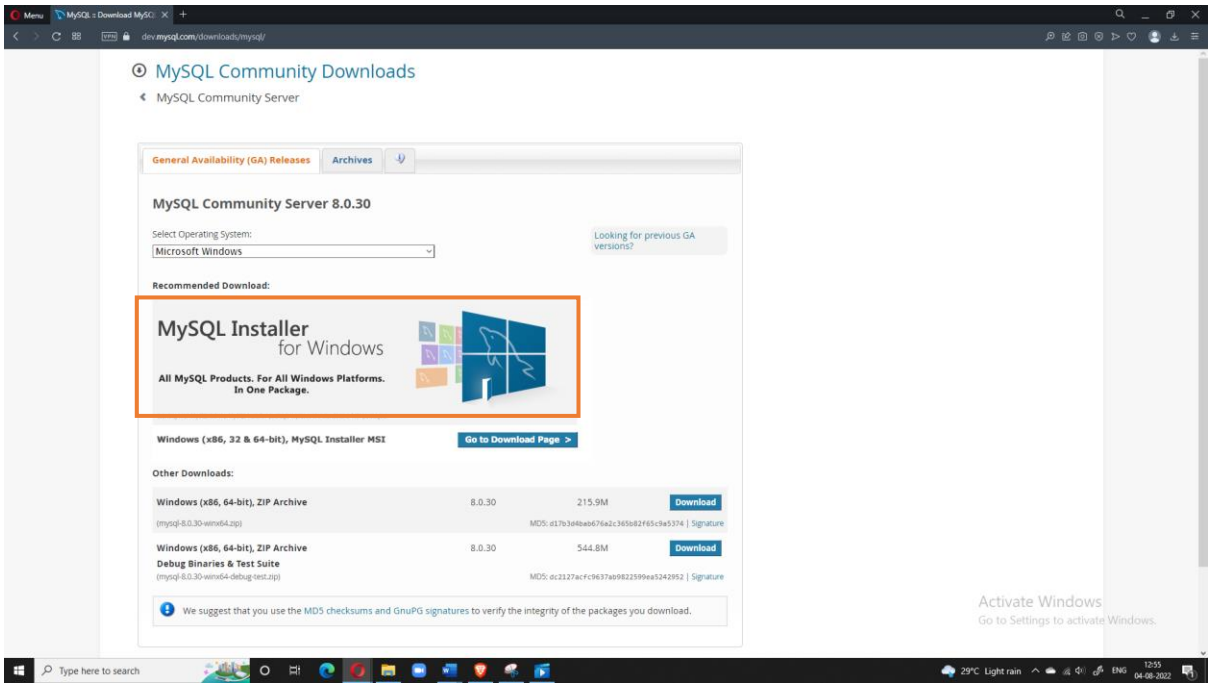
And then click on MySQL Community (GPL) Downloads » link available at the bottom of the page.



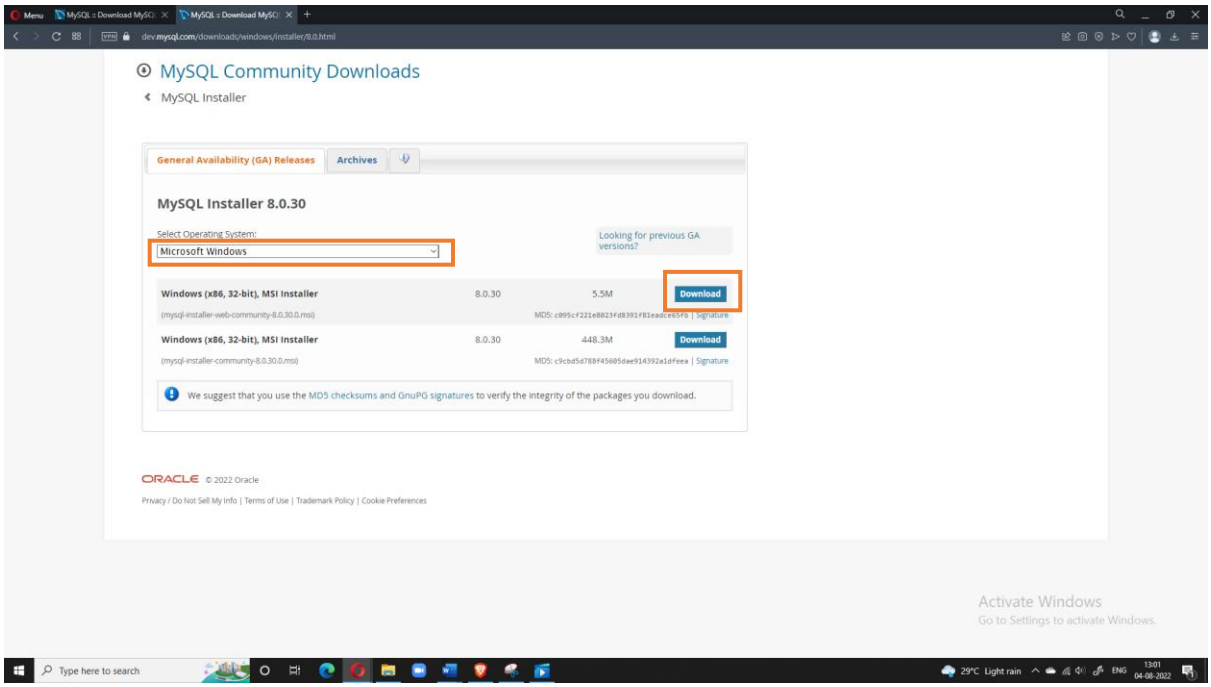
Click on MySQL community server



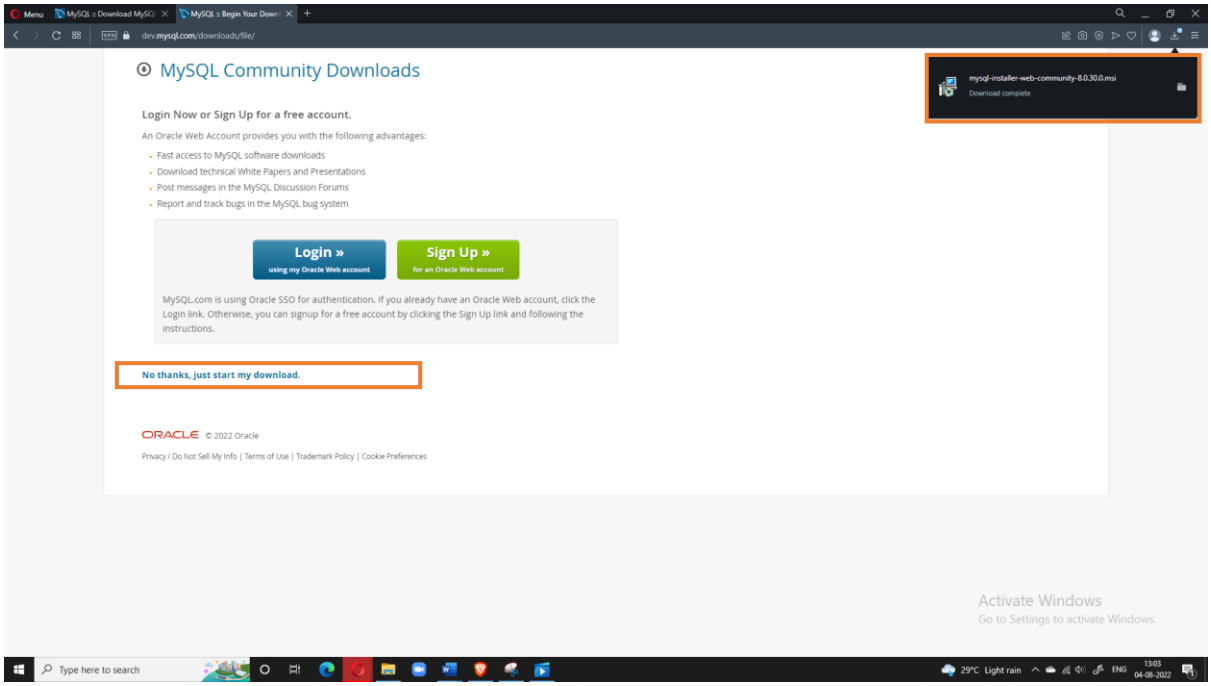
Click on highlighted region

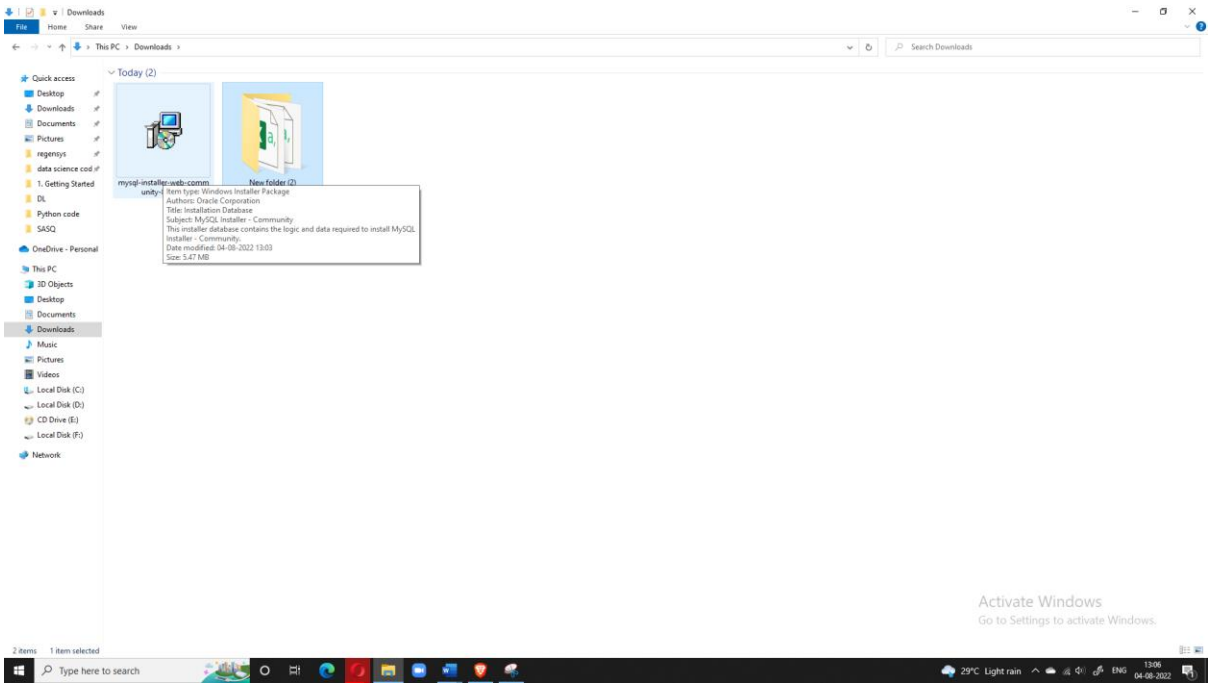


Check if Windows OS is selected, otherwise select appropriate OS, and then click on highlighted Download button

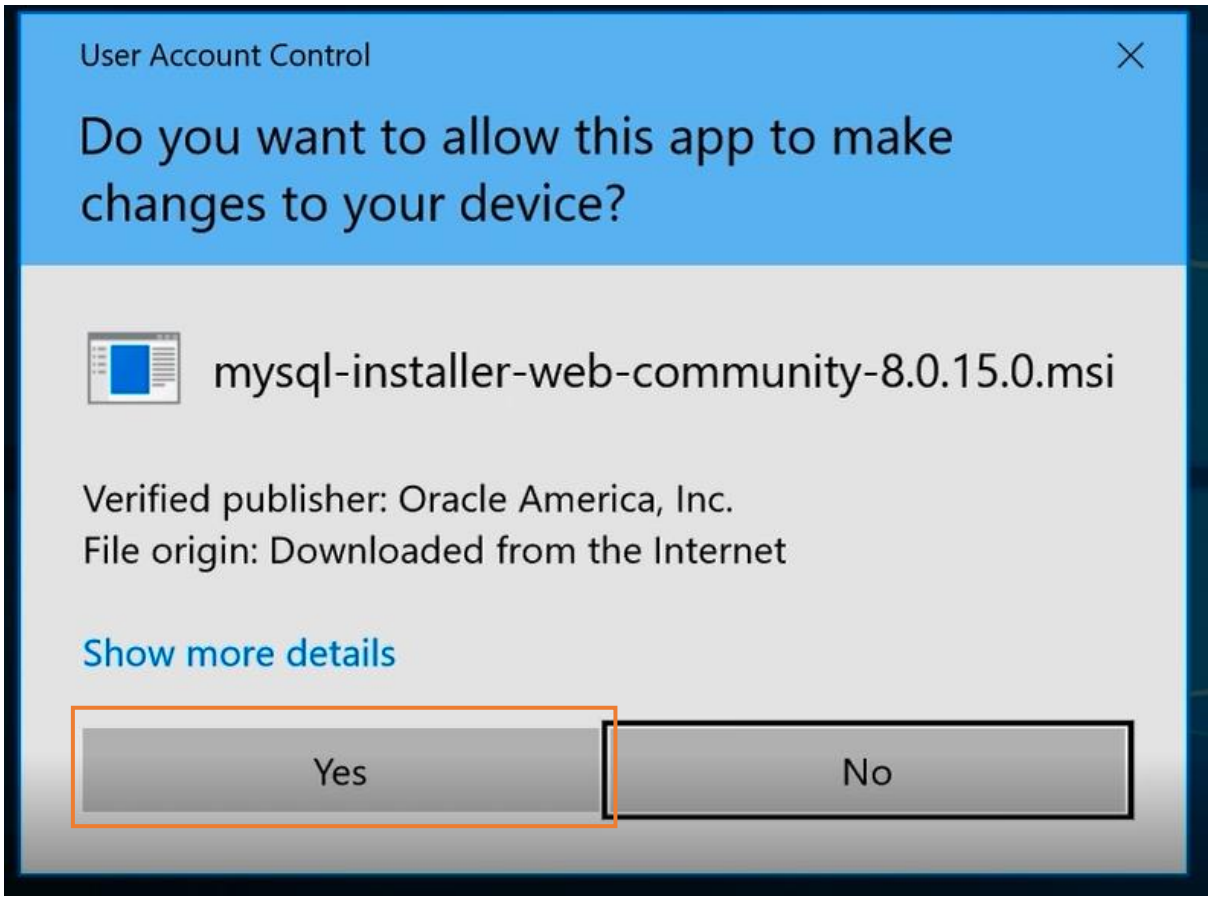


Click on '**No thanks, just start my download.**' Link. Open mysql-installer-web-community-8.0.30.0.msi from Downloads folder with double click.

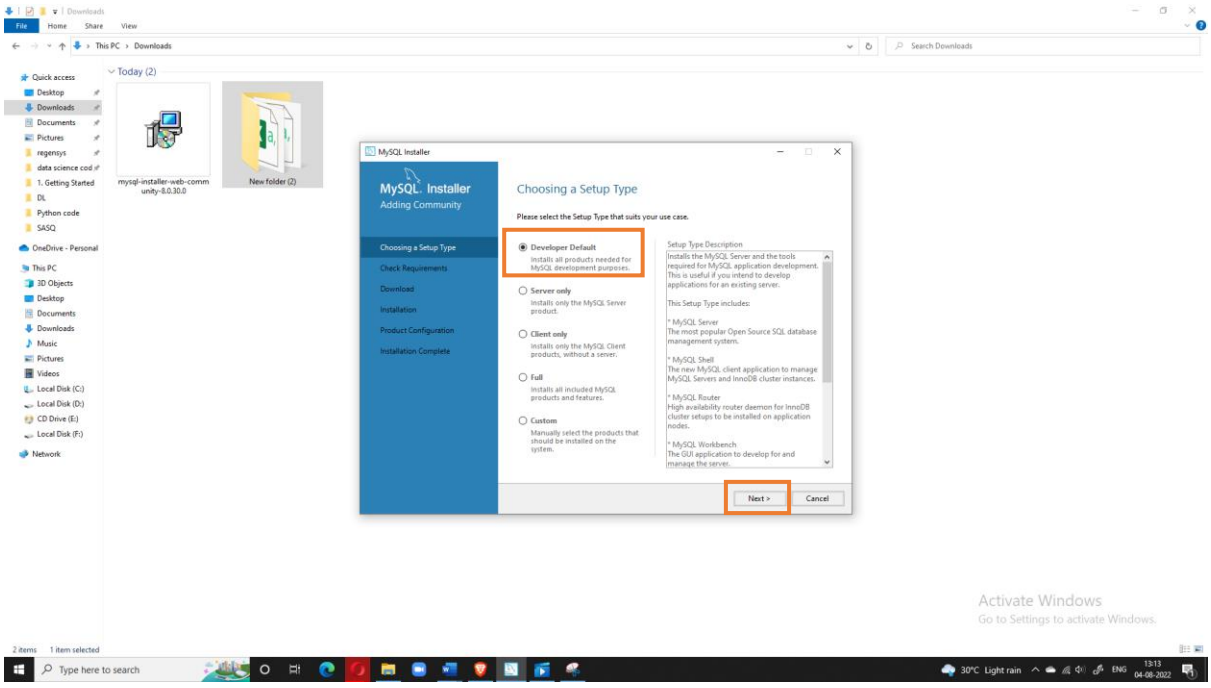




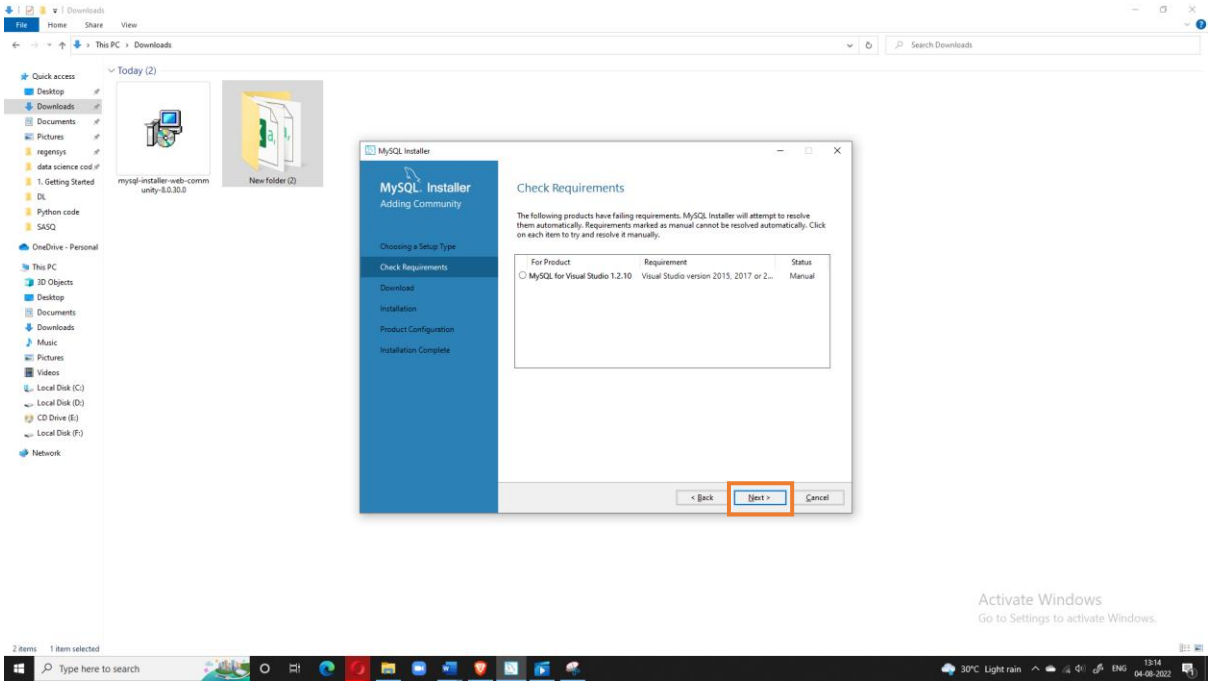
Click on yes button to allow MySQL installation

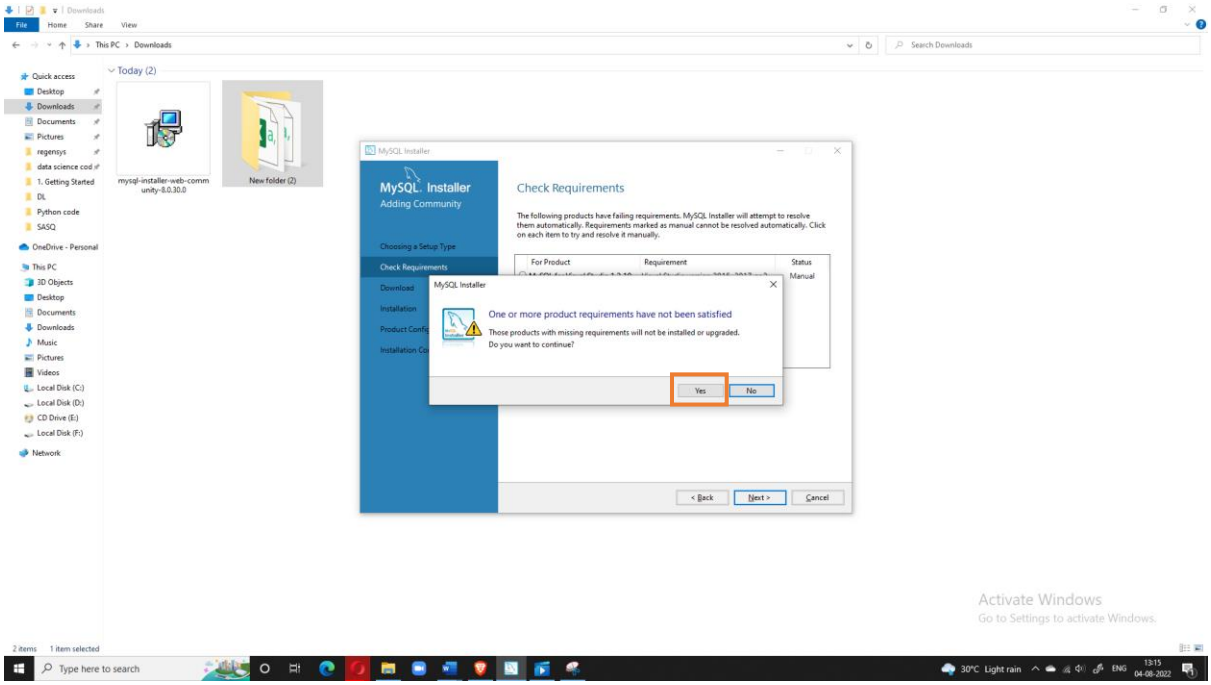


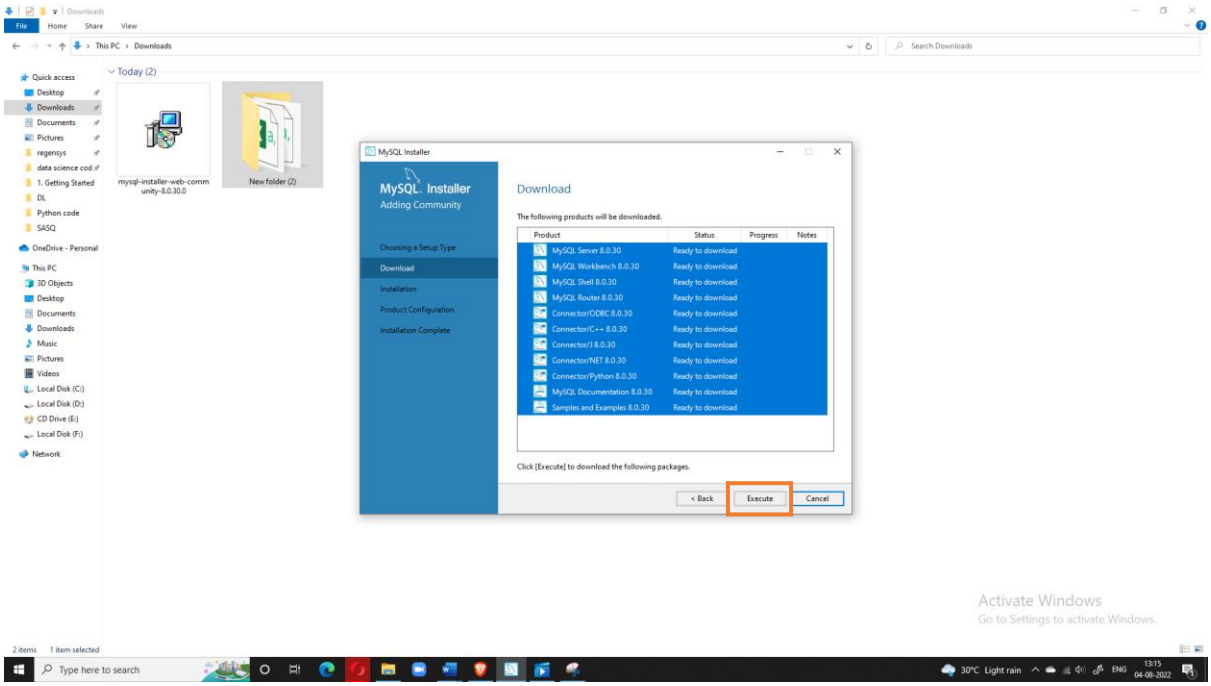
Select Developer Default option and click on next



From now onwards select/click on highlighted link/button







In case if one or more products failed to download, please click on ‘try again’, as in my case MySQL Shell was failed to download.
